Change of DTT programme license from Silver HD to Silver SD

Turner Nordic & Baltic received a notice letter regarding termination of distribution of the Silver HD channel in the DNA DTT network, effective from 30th of September 2013.

DNA has asked Turner to apply for Silver SD instead to have in the same network. And we would like to ask you to support that decision and to transfer the programme license from Silver HD to Silver SD.

Silver SD is having the same content as Silver HD and is a simulcast to the HD version.

We would appreciate your support and help in this matter and for a short decision time as we need to start the Silver SD version from the 1st of September 2013 to avoid any gap in the packaging.

Please let us know if you have any questions!

Have a nice summer,
Best regards

Bo Falk Østergaard
